

Live Facial Recognition Review Date Summary

Introduction

The purpose of this document is to summarise that there has been consideration and consultation regarding the extension of review dates for the MPS Live Facial Recognition Documents.

Review Decision

This confirms the review of these MPS LFR Documents originally due on 20th March 2024. A new review date of 30th June 2024 has been agreed by the SRO for Facial Recognition with input from the Facial Recognition Technology Board and on behalf of the Data Protection Officer. On review, the existing documents are considered to be aligned to the College of Policing APP in relation to Live Facial Recognition and to continue to offer effective controls and safeguards regarding the use of the capability. This short extension allows time for a number of workflows to be completed in a way which should align with a future review date and allow for effective implementation of any changes that may arise.
